

X19

Desks and meeting tables

XUNONOVE structure is composed of 4 aluminium legs 20/10 thick with an irregular trapezoid section made of an aluminium profile with internal supports. The leg is fitted with die-casted aluminium level adjusting glides and upper cover both in chrome finishing. The leg is fitted with 4 sturdy brackets made of chromed die-casted aluminium or in the colours available in the program. In the brackets, are hooked 2 different beams through a rapid expansion system (4 if the tables are 160 cm wide). The beams are always the same colours as the legs except for chromed legs where the beams are silver. For modular meeting tables it is also available a metal central leg fitted for cable management and with 2 cable access.

Legs and brackets are always same colour.

Veneer work top

XUNONOVE also includes a version with 18 mm thick veneer top in the finishings ebony and Canaletto walnut. The wooden tops are featured with a 45° profile turned towards the top except meeting table.

Melamine work top

The melamine tops are 18mm thick, scratch resistant and anti reflex, all fitted with ABS rounded edges in the various colours of the range.

Glass work top

The range includes various solutions with 10 mm thick toughened glass tops. The most important and prestigious glass finishing is **Satinovo** which is satin-smooth, soft touch and fingerprint proof, available in the colour white and black. The other finishings are white or black **Extralight** base glass.

All glass tops are resting on the structure with special slip.

Front panels and accessories

The program includes a range of metal and melamine modesty panels. All the cable management accessories are included in the specific section of the price list.

Cabinets, pedestals and returns

XUNONOVE can be combined with all the cabinets and pedestals included in the specific sections of the price list.

X19 system can use all the cabinets, pedestals and bookcases available on the specific sections of the pricelist.
